Easi-Set Licensed Precast Concrete Products At Work

1. North America's leading freestanding highway safety barrier using the no-horsepower J-Hook connection for faster installation. (NCWHRP 350 TL3)
2. MASH TL-3 Bolt-Down safety barrier for bridge construction or permanent applications.
3. MASH TL-3 Pin-Down safety barrier for cut construction and permanent asphalt applications.

4. SoftSound is a proprietary cementitious composite that is molded and compressed to create a noise wall product that surpasses other materials for sound absorption, durability, thermal, strength & resilience.

5. SoftSound noise walls are available in a wide variety of finishes and colors to match the design aesthetics of the neighboring environment.

6. The noise wall industry's first precast one-piece post and panel system, allowing for cost savings in installation and product production.

7. SlenderWall Precast Building Panels provide a lighter weight alternative to traditional precast concrete or masonry products.

8. SlenderWall is cost-effective for both low-rise complexes and high-rise structures.

9. Easi-Set 100% precast buildings are the perfect choice for all your park and recreation needs.

10. Used for over four decades in a wide variety of industrial and utility applications, from 10x12' storage buildings to 50x250' clear-span buildings.

11. Easi-Set Buildings can be customized and outfitted for very specific uses, like water and waste treatment applications.

12. An innovative parabolic design to reduce wave energy and protect against shoreline erosion.
